PROFILE

Double-degree graduate from École Centrale de Lyon and Tohoku University, I combine a multi-disciplinary general engineering background with international research experience. My specialization in robotics and Artificial Intelligence has led to a publication accepted at IROS 2026.

EDUCATION

Tohoku University

Sendai, Japan

Master of Information Sciences (Double Degree Program)

Oct. 2023 – March 2026

- **Master's Thesis:** *Teleoperation-based Robot Learning for Soft Tube Insertion with Vision and Touch.*
- Co-author of **ViHaTeleop**, a visual-haptic teleoperation system for dexterous manipulation learning → **Accepted at IROS 2026** (IEEE/RSJ International Conference on Intelligent Robots and Systems).
- Developed an end-to-end **robot learning pipeline**: data collection (300 trajectories), multimodal sensor fusion (YOLO, ResNet, tactile), and behavior cloning policy training.
- Built and deployed a full robotic manipulation system (**Franka** arm, **LEAP Hand**, tactile sensors, **RealSense** cameras).

Ecole Centrale de Lyon

Ecully, France

Diplôme d'Ingénieur (Generalist Engineering Degree)

Sept. 2021 – Expected 2026

- Generalist curriculum covering all engineering fields. Top 10 French "Grande École".
- **Autonomous Drone Project:** Implemented PID control and gradient descent for autonomous navigation; detected surrounding objects with LiDAR and YOLO.
- **Industrial Project (French Air Force):** Performed on-base energy audits of Base 942. Modeled the thermodynamic process of heat recovery from servers and proposed solutions for storage and redirection to the base facilities.

Lycée Fabert

Metz, France

CPGE - Intensive Preparatory Classes (PSI)

Sept. 2019 – July 2021

Lycée Pierre Bayle

Sedan, France

Scientific Baccalauréat – Highest Honors - Final Grade: 18.3/20.

2019

PROFESSIONAL EXPERIENCE

Engineering Intern

May 2023 – July 2023

National Institute of Applied Sciences of Lyon, Ampère Laboratory

Villeurbanne, France

- Developed a "freehand" 3D ultrasound reconstruction solution using electromagnetic tracking (**trakSTAR**).
- Synchronized hardware between the ultrasound image capture and the position sensor; and implemented volumetric reconstruction algorithms in **MATLAB**.

Technical Worker Intern

July 2022

Constructions Métalliques de Douzy

Douzy, France

- Production of metallic components using Computer-Aided Manufacturing (CAM) tools.

EXTRACURRICULAR ACTIVITIES

President | Japan Club - Ecole Centrale de Lyon

Sept. 2022 – Feb. 2023

- Organized "Japan Week" on campus, managing cultural events and workshops for all students.

Twitch & Stream Manager | E-Challenge - Ecole Centrale de Lyon

Feb. 2022 – March 2023

- Managed audiovisual hardware and software using **OBS** for a student esports tournament broadcasted on Twitch.

TECHNICAL SKILLS & LANGUAGES

Languages: French (Native), English (Fluent), Japanese (N4/N3 approx.), German (B1)

Programming & Software: Python (primary), C/C++, MATLAB, Linux/Ubuntu, Git, $\LaTeX$

Robotics & Control: ROS2, PID Control, Robot Manipulation (Franka, LEAP Hand, Dynamixel SDK), Tactile sensing & Haptics

AI & Computer Vision: PyTorch, Behavior Cloning, YOLO, MediaPipe, OpenCV, ResNet
