PROFILE

Robotics & AI Engineer with hands-on experience in robot learning and real-world robotic systems. Trained at Centrale Lyon and Tohoku University, I developed an end-to-end learning pipeline for dexterous manipulation, combining teleoperation, multimodal perception, tactile sensing and imitation learning. Co-author of ViHaTeleop, accepted at IROS 2026.

EDUCATION

Tohoku University

Master of Information Sciences (Double Degree Program)

Sendai, Japan

Oct. 2023 – March 2026

- **Master's Thesis:** Teleoperation-based Robot Learning for Soft Tube Insertion with Vision and Touch.
- Co-author of **ViHaTeleop**, a visual-haptic teleoperation system for dexterous manipulation learning → **Accepted at IROS 2026** (IEEE/RSJ International Conference on Intelligent Robots and Systems).
- Developed an end-to-end **robot learning pipeline**: data collection (300 trajectories), multimodal sensor fusion (YOLO, ResNet, tactile), and behavior cloning policy training.
- Built and deployed a full robotic manipulation system (**Franka** arm, **LEAP Hand**, tactile sensors, **RealSense** cameras).

Ecole Centrale de Lyon

Diplôme d'Ingénieur (Generalist Engineering Degree)

Ecully, France

Sept. 2021 – Expected 2026

- Generalist curriculum covering all engineering fields. Top 10 French "Grande École".
- **Autonomous Drone Project:** Implemented PID control and gradient descent for autonomous navigation; detected surrounding objects with Sonar and YOLO.
- **Industrial Project (French Air Force):** Performed on-base energy audits of Base 942. Modeled the thermodynamic process of heat recovery from servers and proposed solutions for storage and redirection to the base facilities.

Lycée Fabert

CPGE - Scientific Preparatory Classes (PSI)

Metz, France

Sept. 2019 – July 2021

PROFESSIONAL EXPERIENCE

Engineering Intern

National Institute of Applied Sciences of Lyon, Ampère Laboratory

May 2023 – July 2023

Villeurbanne, France

- Developed a "freehand" 3D ultrasound reconstruction solution using electromagnetic tracking (**trakSTAR**).
- Synchronized hardware between the ultrasound image capture and the position sensor, and implemented volumetric reconstruction algorithms in **MATLAB**.

Technical Worker Intern

Constructions Métalliques de Douzy

July 2022

Douzy, France

- Production of metallic components using Computer-Aided Manufacturing (CAM) tools.

EXTRACURRICULAR ACTIVITIES

President | Japan Club - Ecole Centrale de Lyon

Sept. 2022 – Feb. 2023

- Organized "Japan Week" on campus, managing cultural events and workshops for all students.

Twitch & Stream Manager | E-Challenge - Ecole Centrale de Lyon

Feb. 2022 – March 2023

- Managed audiovisual hardware and software using **OBS** for a student esports tournament broadcasted on Twitch.

TECHNICAL SKILLS & LANGUAGES

Languages: French (Native), English (Fluent), Japanese (N4 approx.), German (B1)

Programming & Software: Python (primary), C/C++, MATLAB, Linux/Ubuntu, Git, ~~TeX~~

Robotics & Control: ROS2, Robot Manipulation (Franka, LEAP Hand), Teleoperation, PID Control, Sensor/Actuator Integration

AI, Perception & Robot Learning: PyTorch, Imitation Learning, Behavior Cloning, Multimodal & 3D Perception, Computer Vision, YOLO, ResNet, OpenCV, MediaPipe
